PROJECTS

ZEUSDev – Interactive Web Developer Portfolio

<https://z7zeus7z.github.io/MyPortfolio/>

A simple static website built as part of a web development learning project.

- A dynamic, single-page portfolio website built with **React**, **Vite**, and **CSS Modules** to showcase web development skills.
- Developed using modern front-end practices, including **component-based architecture** and reusable UI elements. Hosted on GitHub Pages for live access and version control
- Features a structured homepage, project sections, and interactive navigation with scoped and maintainable styling

- Hosted on **GitHub Pages** for live access and version control.
- Organized project files for scalability and maintainability.
- Gained hands-on experience with **React, Vite, CSS Modules, JavaScript ES6, Git**, and web deployment.

DriveSpot – Car Rental Platform (Front-End)

<https://z7zeus7z.github.io/car-rental/>

- A responsive, multi-page web application built with **React, Vite, CSS Modules**, and **useState** for managing dynamic component states.
- Allows users to **rent cars** or **list their own cars** for rental, with intuitive navigation and interactive UI.
- Features dynamic car listings, detailed views, and user-friendly forms for bookings and listings.
- Hosted on **GitHub Pages**, demonstrating live deployment and version control.
- Gained hands-on experience with **React, Vite, CSS Modules, useState, React Router**, and modern front-end development practices.
